

E-810

This is what started it. The E series. Using the same hybrid transmission line loading as its brother the S series, the E strikes a slimmer and longer profile. It maintains the same ultra narrow zero baffle design and is proportionately more compact than the S. It is designed for maximum clean output at high SPLs. The E series is ideal for DJ and sound reinforcement for medium to large nightclubs. It can be mounted horizontally or vertically.

DESIGN HIGHLIGHTS

- Revolutionary, patents and patent pending hybrid transmission line enclosure loading
- High resolution, full range response with expansive sound field
- Low loss, high order crossover networks with Speakon® terminals
- 8" BMS cast woofers
- BMS compression horn
- DJ/Pro/Club Application
- Fog Machine Adapter
- 600 Watts RMS Power
- 125 db output
- Weather Resistant
- 45-21k Frequency Range
- Dimensions: 47" L x 9" W x 18" D

LISTENING OUTSIDE THE BOX®

E-810

Design	2-way Hybrid Transmission Line, zero baffle.
Drive Units	HF:BMS (Germany) Time aligned Compression Titanium driver LF: BMS (Germany) Dual 8-inch neo mid-woofers
Frequency Response	40Hz to 20kHz (+ / - 3db.)
Crossover Frequency	1.5kHz
Maximum Power	600 Watts
Minimum Power	50 Watts
Sensitivity	(2.83V/1m) 92 dB
Maximum Output	125 dB
Impedance	6 Ohms Nominal
Mounting Options	Tripod stand, wall, (Horizontal or vertical)
Connections	¼ TRS, Neutrix
Finish	Custom Paint
Dimensions	48 in x 9 in x 18 in (HxWxD)
Weight	38 lbs
